Preface	ix
Files and their Relationships	xv
1 The Java Programming Language	1
1.1 What is Java?	1
1.2 Installing Java: A Simple Program	2
1.2.1 Hello World	3
1.2.2 Syntax	4
1.2.3 Packages	5
1.2.4 JAR Files	8
1.3 Language Details	8
1.3.1 Reserved Words	8
1.3.2 Types and Variables	9
1.3.3 Strings, Arrays, Pointers and <code>null</code>	11
1.3.4 Operators	13
1.3.5 Statements	15
1.3.6 Exercises	20
1.4 Object-Oriented Features	21
1.4.1 Classes and Objects	22
1.4.2 Encapsulation: <code>public</code> , <code>private</code> and <code>protected</code>	24
1.4.3 Modifiers: <code>static</code> and <code>final</code>	25
1.4.4 Constructors and <code>this</code>	28
1.4.5 Extending Classes and Inheritance	30
1.4.6 Everything is an <code>Object</code>	32
1.4.7 Casting	33
1.4.8 Exercises	34
1.4.9 Class-like Objects	36
1.4.10 Exceptions	38
1.5 Necessary Classes	41
1.6 Useful Examples	43
1.6.1 An Input Line Reader	43
1.6.2 Finding Files	45
1.6.3 Giving the User Choices	46
1.6.4 A Dialog for Text Input	49

2	Spatial Geometry	51
2.1	Lines and Planes	51
2.2	Translation and Rotation	53
2.3	Using 4×4 Matrices	57
2.4	Reflection	57
2.4.1	Two-dimensional Reflection	57
2.4.2	Three-dimensional Reflection	58
2.5	Projection	59
2.5.1	Parallel Projection	59
2.5.2	Perspective Projection	62
3	Shading Spheres	65
3.1	A Simple Shaded Sphere	65
3.1.1	The Projection	66
3.1.2	A Shading Model	67
3.1.3	The Window Class	69
3.1.4	The Drawing Class	73
3.2	Mobile Eye	79
3.2.1	The Drawing Class	79
3.2.2	Keyboard and Mouse Events	80
3.2.3	Geometry	83
3.3	Drawable Sphere	84
3.3.1	Overview	87
3.3.2	Drawing the Curves	88
3.4	Surface Features	89
3.4.1	Viewing JPEG Files	89
3.4.2	Pasting an Image	91
3.4.3	A Sphere with Surface Details	93
4	The Ellipse and Kepler's Laws	97
4.1	Definition and Parts of the Ellipse	97
4.2	Tangent to the Ellipse	100
4.3	Polar Representation	104
4.4	Kepler's Second and Third Laws	108
4.4.1	Determining Perihelion and Aphelion	108
4.4.2	Kepler's Equation	110
4.4.3	An Animation	114
5	Astronomy: Overview	119
5.1	Introduction	119
5.2	An Animation of the Sun and Earth	121
5.2.1	Improved Sphere Class	121
5.2.2	Keyboard Listener	131
5.2.3	Sphere with Equator and Ecliptic	133
5.2.4	A Simple Animation	134
5.2.5	An Improved Animation	139
5.3	Coordinate Systems	144
5.3.1	Equatorial Coordinates	145

5.3.2	Horizon Coordinates	147
5.3.3	Ecliptic Coordinates	147
5.4	Time	148
6	Astronomy: Details	153
6.1	Changing Coordinate Systems	153
6.1.1	Hour Angle \leftrightarrow Right Ascension	154
6.1.2	Equatorial \leftrightarrow Ecliptic	154
6.1.3	Horizon \leftrightarrow Equatorial	156
6.1.4	Code for Coordinate Conversion	162
6.2	Long-term Variation of Coordinate Axes	167
6.2.1	Qualitative Description	168
6.2.2	Formulas	171
6.2.3	Code for Precession and Nutation	176
6.2.4	Animation of Precession	179
6.3	Time	182
6.3.1	Time: A Summary	189
6.3.2	Time: Utility Code	190
6.3.3	Animating the Equation of Time	191
6.4	Factors that are Ignored	197
6.4.1	Time	198
6.4.2	Refraction	198
6.4.3	Aberration	198
6.4.4	Relativistic Effects	199
6.4.5	Parallax	199
6.4.6	The Shape of the Earth	199
7	The JPL Data	203
7.1	Chebyshev Polynomials	203
7.2	Overview of the Data	204
7.2.1	The ASCII Files	205
7.2.2	The Binary Files	209
7.3	Using the JPL Data	209
7.4	Serialization	217
7.5	Converting the JPL Data to Java Format	218
7.6	Coordinates of the Planets	228
8	Animating the JPL Data	231
8.1	A Simple Animation	231
8.2	Improving the Animation	234
8.2.1	<code>PlanetState</code>	234
8.2.2	<code>MobileAnim</code>	234
8.2.3	<code>MobilePane</code>	236

9	Adding the Stars	243
9.1	Stellar Position and Proper Motion Data	243
9.2	The Stars on the Celestial Sphere	246
9.2.1	Displaying the Stars on an <code>OutSphere</code>	246
9.2.2	The <code>StarWindow main()</code> -class	248
9.3	Animation of Proper Motion	250
9.4	The Planets on the Celestial Sphere	251
9.4.1	Displaying the Planets on an <code>OutSphere</code>	252
9.4.2	The <code>JPLSphereAnim main()</code> -class	254
9.5	The Celestial Sphere with Stars and Planets	255
10	Spaceship Earth	259
10.1	View from Inside a Sphere: Code	259
10.1.1	The <code>InSphere</code> Class	259
10.1.2	Helper Classes	267
10.2	Explanation of <code>InSphere</code>	269
10.2.1	Projection	270
10.2.2	Zooming In and Out	272
10.3	Viewing the Stars	273
10.3.1	<code>InsideStarSphere</code>	273
10.3.2	<code>InsideStarWindow</code>	275
10.4	The Stars and Planets	276
10.4.1	<code>InsideJPLSphere</code>	276
10.4.2	<code>CEarthPane</code>	278
10.4.3	<code>CEarthAnim</code>	280
11	View from Earth's Surface	285
11.1	Generating a Static View	285
11.2	Animating the View	291
A	Mathematical Review	297
A.1	Notation	297
A.2	Trigonometry	298
A.2.1	Inverse Trigonometric Functions	300
A.2.2	Arc-tangent	301
A.2.3	Trigonometric Identities	302
A.3	Vectors	306
A.3.1	The Dot Product	307
A.3.2	The Cross Product	308
A.3.3	Velocity Vector and Angular Velocity	311
A.4	Polar and Spherical Coordinates	311
A.5	Matrices	314
A.5.1	Matrix Algebra	314
A.5.2	The Determinant	316
A.6	Linear Independence	317
A.7	Spherical Trigonometry	319
A.8	Under the Rug	322
A.8.1	Tangents to a Curve or Surface	322

A.8.2	Area and Stretching	323
A.9	Utility Code	324
B	Contents of the CD	331
B.1	List of Files	331
B.2	Running the Programs	331
B.3	The Java Front-end	332
B.3.1	ListDialog	332
B.3.2	Main	335
B.3.3	CmdRunner	338
B.3.4	CmdLineWindow	339
B.3.5	LineListener	340
B.3.6	InStreamGlue	341
B.3.7	OutStreamGlue	342
B.3.8	CmdLineDocFilter	342
	Bibliography	345
	Index	351
