

## AIP4Win2.0 Registration Process

1. Enter your name in the “User Name” boxes EXACTLY as you want the program to be registered.
  2. Enter the serial number in the boxes headed by Serial Number. The serial number for AIP4Win2.X is found on the inside back cover of the book.
  3. The AIP4Win2.0 popup window will automatically generate an installation code.
  4. To register with our server AIP4Win database there are two options:
    - a. If your computer is connected to the web click on the box titled “Register via the Web” and fill out the form that pops up (This is by far the most easy and foolproof way to register).
    - b. If your computer is not connected to the web you must manually enter the data at: <http://www.willbell.com/registration.asp>. BEWARE you must enter the required data exactly as shown on the AIP4Win2.0 registration popup window. Specifically, your name is part of the registration process. You must enter it EXACTLY as shown—upper and lower case, etc.
- To see exactly what you must enter click on Save Registration Data to text file.  
Enter a file name and after it is saved read it with any text editor.**
5. Whatever registration process you choose your registration is confirmed by a return email. If you have a “tight” span blocker you might block this email. This email is usually sent with an hour of your registration.

**AIP4Win Registration**

Please enter your name, and the Serial Number from the sticker in the back of The Handbook of Astronomical Image Processing:

User Name: First [ ] Last [ ]

Serial Number: [ ] [ ] [ ] [ ]

When first installed, AIP4Win it will run for 30 days until it is registered, by going to [www.WillBell.com](http://www.WillBell.com) or by sending your Name, Serial Number and the Installation Code shown below to Willmann-Bell. You will receive a Registration Code to be entered in the box below, after which it will run forever. Click Help for more information.

Installation Code: [ ] [ ] [ ] [ ]

Registration Code: [ ] [ ]
