

Uranometria 2000.0's X-Ray Source Database

These are shown with an open centered "X" in cases where the source is invisible or below the chart's limit. About 35 of them are included herein. Where the visible source is plotted, the special symbol does not appear. Objects are generally labeled by common name (e.g. M82, NGC 1815, LMC S-2 [Large Magellanic Cloud], or γ Cas).
